Isocore Announces Program for Net-Centric 2016

Isocore today announced the full program for Net-Centric 2016 Conference to take place October 16-19, 2016 in Arlington, VA.

Net-Centric 2016 is the 19th annual of this event, and is addressing the most important contemporary topics of interest to the industry. This year, the conference covers interesting areas of Cloud Networks and Data Centers, Virtualization, Network Analytics, Big Data & Self-Learning Networks, Software Defined Networks (SDN), and Open Source- Software and Technologies. It will include an extensive four day program that will consist of tutorials, technical sessions, and exhibits. This year's conference is supported by major service providers and networking equipment vendors.

Registration for Net-Centric 2016 is now open on the conference website:
