

Fujitsu IP Transport Solution for NGN

Fujitsu is the leading supplier of high performance telecommunications solutions and provides comprehensive IP Transport solution for NGN, addressing to a wide variety of applications and providing network operators and service operators with innovative and resilient systems.

FMC: Fixed Mobile Convergence, G-PON: Gigabit Passive Optical Network, IVR: Interactive Voice Response, IMS : IP Multimedia Subsystem
 MSAN: Multi-Service Access Node, MSPP: Multi-Service Provisioning Platform, ROADM: Reconfigurable Optical Add-Drop Multiplexer

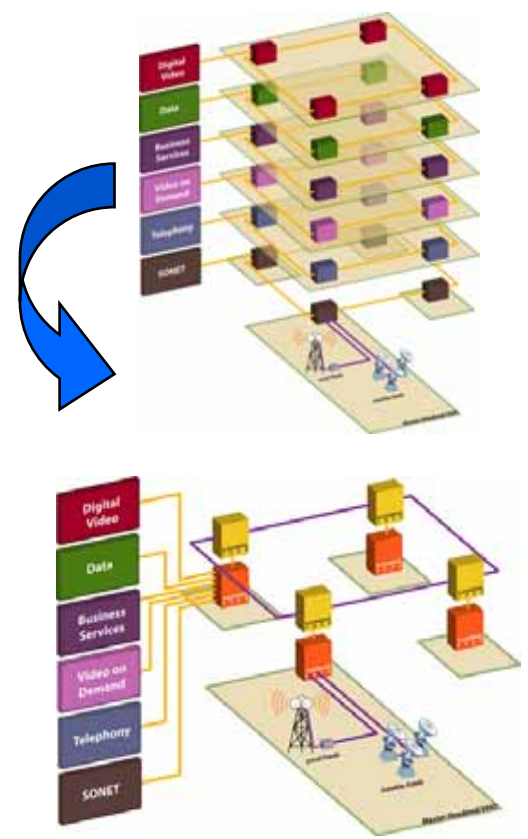

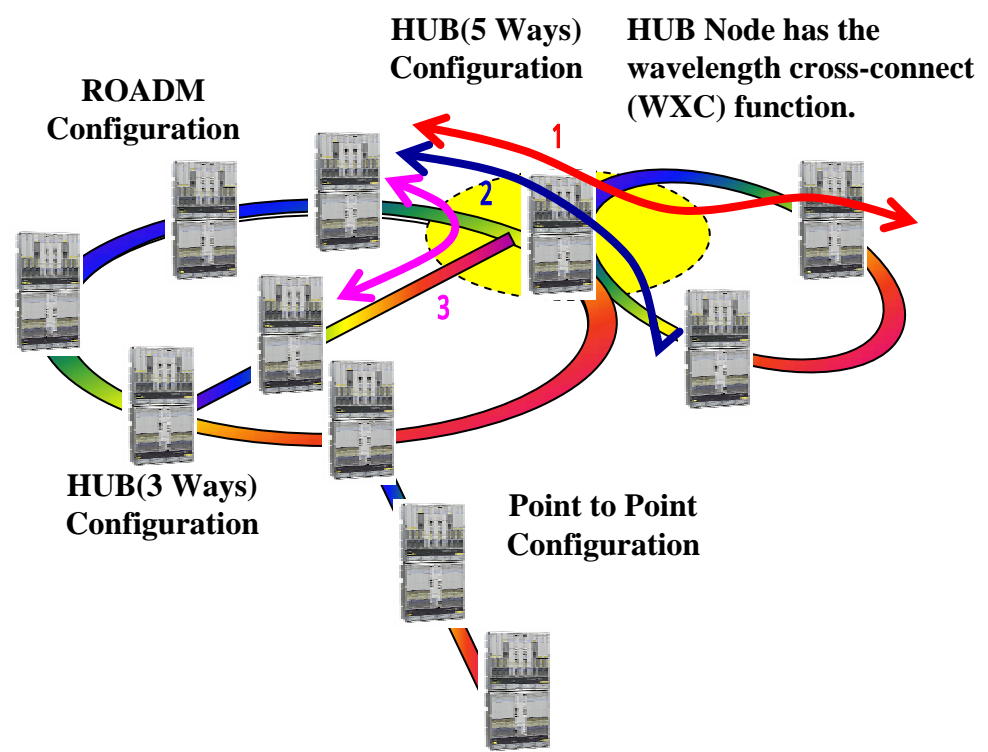

Core Transport Layer Solution FLASHWAVE 7500S/X

FLASHWAVE® 7500 Reconfigurable Optical Add/Drop Multiplexer (ROADM) is a next-generation Dense Wavelength Division Multiplexing (DWDM) system.

- Support for Point to Point, Ring, mesh photonic networking for optimizing the network investment to the service demand.

- Cost-effective broadband services require a single, seamless network.

Note: FLASHWAVE® is a trademark of Fujitsu Limited.
